

Ash taught us about the safety way to use the tools. My favourite thing was hammering and sawing because I haven't sawed or hammered before. Madison

My best part was sawing with the saw. You had to cut the house out. Then you had to bang the nails into it to make the pencil holder. Matthew

Ash was the woodwork person. We made a house pencil holder. My best part was the hammering because I could hammer hard when I was going through the big bit of the wood. I learnt to slowly keep sawing and turn it when you had to go around the corner. Thomas.

WOODWORK FUN IN 1S

Ash was teaching us how to build a house holder. My best thing is sawing. The new thing I learnt about was how to saw and tilt the saw so I could cut on the side. My house looked good. Codey

At woodwork we built a pencil holder. We did some sawing and some hammering and some sandpapering. We had to smooth the sides of the wood. Doing the sandpapering was my best part. Jessica

Ash is a man. He taught us how to build with wood. We learnt the safety way of using the tools. My favourite part is standing on the woodwork bench table. We had to put one foot on the step when you were cutting. Rhiannon
